

CSE216- Web Programming 2
TOROS UNIVERSITY
COMPUTER AND SOFTWARE ENGINEERING DEPATRMENT
Laboratory Work #4

This laboratory work covers basic PHP

1. Create a database “mydatabase1” and then create one table for this database as table1.

Table1:

UserName	Password	Email

2. Write a complete PHP code to login into a website. Your program should allow the users to enter to the website if their UserName, Password and Email are available in the database by printing the message as “Welcome”. Otherwise your code should show you a message as “Please register firs”. For registering you should insert UserName, Password and Email into the table of database and then your code should print a message as “You register successfully”.
